

SAFE-STRIDE™

Commercial Hygiene Service & Supply Specialists

Prevent slips, trips & fall accidents with Safe-Stride Non-Slip

What is Safe-Stride Non-Slip?

- ✓ Safe-Stride Non-Slip is a long lasting chemical treatment which creates an invisible tread design into the floor surface, improving the co-efficient of friction.
- ✓ The process is not a coating; it will not alter the aesthetic appearance of most floor surfaces.
- ✓ Safe-Stride Non-Slip is the original award winning process for treating tiles, marble, granite, porcelain, terrazzo, concrete and other hard mineral surfaces which are slippery when wet.

Safe-Stride Non-slip is effective on all floor surfaces which are subject to getting wet such as:

- Kitchens
- Public walkways
- Restrooms & Showers
- Swimming Pools
- Foyers
- Steps & Ramps

Quality Assurance

- Up to 5 years warranty
- Regular floor condition & safety surveys
- Superior lasting performance
- Training in floor cleaning procedures
- Reduces liability issues

Statistics extracted from The Health and Safety Authority

- Slips, trips and falls account for about one fifth of all notified accidents
- 44% of Injuries Board employer liability awards were for slips, trips and falls
- One in five slips, trips or falls result in an absence over a month
- Half of workers surveyed believed it is their company's responsibility (not theirs) to prevent slips and trips
- Slip fall accidents rank second to road traffic accidents

Previous Projects

- AIB • Guinness Store House • Inchydoney Island Lodge & Spa
- Mater Private Hospital • McDonald's • Topaz Energy

American Slip Meter. The world's most compact and affordable Slip Meter

American Slip Meter:

- ✓ An everyday tool for monitoring floor safety and maintenance
- ✓ Slip meters are designed for portability and for field use

Improve Safety – Reduce Negligence

- A simple test of the co-efficient of friction level of your floors and walkways will provide valuable data about safety levels and ongoing maintenance
- Recording of readings in the logbook provided are useful in defense of negligence litigation
- Safe-Stride provides a complete on-site survey of floor surfaces to determine slip resistance values (co-efficient of friction) in wet and dry conditions, using the ASM Slip Meter
- Safe-Stride supplies this valuable measuring device to Health and Safety professionals including Insurance Risk Assessors

Floor Safety Survey:

- Safe-Stride provides Floor Safety Reports which are valuable for inclusion in health & safety audits/statements

Safe-Stride International Inc., the world's leading floor safety company, developed the concept of non-slip floor treatments in the U.S. in 1984. Supporting and serving global industry. Safe-Stride Europe was established in Ireland in 1990.
